

Notice

Kit Contains:

- 4 Shock absorbers
- 1 Instruction Sheet

⚠ WARNING	
	Electrical Shock Hazard Disconnect power before servicing. Replace all parts and panels before operating. Failure to do so can result in death or electrical shock.

IMPORTANT: New design shock absorber does not include the u-bracket or mounting hardware.

NOTE: When replacing a shock absorber, all other shock absorbers must be replaced as well. If your washing machine has three shock absorbers, then one shock absorber from service replacement kit will not be used in the repair. When removing original shock absorbers from the washing machine, do not remove the u-bracket from the base, only remove the nut and bolt from each shock absorber. When installing new shock absorbers, original bolt and nut must be used. See *Figure 1*.
